- 1997- Nursing Certification identified as a priority
- 2001- Palliative Nursing Standards
- 2002- Informal Executive Appointed
- 2003- Formal Executive Elected and Terms of Reference adopted
- 2004- Nurse’s Group Workplan
Why Certification?

- Defines the model for hospice palliative care
- Increased personal/professional satisfaction
- Aligns with CNO Continuing Competence Programs
- Certification closes the gap between nursing education and practice
- Employers’ support certification
- Universities grant credits toward Nursing Degree
- Defines “Generalist”, “Specialist” or “Advanced Practice” role in hospice palliative care nursing
Role Definitions in Hospice Palliative Care Nursing

- Generalist Role
  - Prepared to care for patients in a variety of health care settings, requires basic understanding of hospice palliative care principles and understands pain and other symptom issues in the context of the palliative care team.
Role Definitions in Hospice Palliative Care Nursing

- Specialist Role
  - “Specialist palliative care nursing aims to provide relief from suffering and improve Quality of Life for both patients and their families. It is a holistic approach acknowledging that suffering is more than physical distress, and recognizing that the patient requires a combination of physical, psychological, social and spiritual care.

Royal College of Nursing (2000)
Role Definitions in Hospice Palliative Care Nursing

- Advanced Practice Role
  - Generally works as a consultant throughout a facility or program using a framework for advanced practice as defined by C.N.A.
